TECHNICAL DATA SHEET

DMSD 4-Tool Rework Station with DT530

DMSD offers a solution **for both SMDs and high-power applications** . This station is **perfect for desoldering jobs of through-hole components and removing excess solder after SMD rework**

It offers the **highest soldering quality** thanks to **JBC Most Efficient Soldering System** , with **Intelligent Heat Management** to extend tip life and reduce energy consumption.

Includes:

- **DME** 4-Tool Control Unit manages up to 4 tools simultaneously and is fully compatible with 13 different **JBC Tools** , delivering up to 150 W per tool.
- **T245** General Purpose Handle and **DT530** Angled Desoldering Iron.
- T245 works with **C245** Cartridge Range and DT530 with **D530** Tip Range.
- **MSE** Electric Desoldering Module provides exceptional suction power, reaching up to 85% vacuum, ensuring precise and efficient solder removal.
