TECHNICAL DATA SHEET

DMSE 4-Tool Rework Station

Equipped with **MSE Module** , DMSE Station offers a **versatile solution for SMD and high-power applications** . Its **powerful suction module excels in desoldering through-hole components and removing excess solder after SMD rework** , ensuring clean, precise results across a wide range of soldering tasks.

It offers the **highest soldering quality** thanks to **JBC Most Efficient Soldering System** , with **Intelligent Heat Management** to **extend tip life and reduce energy consumption**

Includes:

- **DME** 4-Tool Control Unit managing up to 4 tools simultaneously and fully compatible with 13 different **JBC Tools** , delivering up to 150 W per tool.
- **T245** General Purpose Handle which works with **C245** Cartridge Range.
- **DR560** Desoldering Iron which works with **C560** Tip Range.
- **MSE** Electric Desoldering Module offering exceptional suction power for a complete desoldering process.
