

6001, 6002 Mat & Table Top Cleaner

Static dissipative cleaner for ESD mats

ACL Mat & Table Top Cleaner is a multi-purpose static dissipative rejuventating cleaner that is designed for ESD mats. It is the ideal cleaner for areas in which static-sensitive devices are assembled, tested, and handled, but can also be used in areas that require a mild but effective cleaner. This non-abrasive formula cleans and rejuvenates dead spots and is safe to use on workstations, table tops and anti-static mats, including rubber and vinyl.

Mat & Table Top Cleaner is a non-flammable cleaner that leaves no film or streaks. It effectively removes flux residues, oily finger marks, grease, nicotine, dirt, grime and inorganic contaminants. It also removes dirt on chair mats and other anti-static mats without degrading the surface's anti-static properties.

Easy to Use:

Apply liberally to the areas to be cleaned. Wait 2-3 minutes to allow emulsifiers to penetrate. Wipe dry with a lint-free cloth (#LF50 or #8044).

Product #6001

12 quarts per case; includes trigger spray

Product #6002

4 gallons per case

- ❖ Contains no alkali or ammonia
- ❖ Maintains original surface resistivity of anti-static mats
- ❖ Cleans, rejuvenates, and extends the life of ESD mats
- ❖ Meets or exceeds Mil 81705 & NFPA 56A with an electrostatic decay time of .1 second according to FED Test Method 4046
