GROUNDING

A good ESD static control program starts with a good daily mat cleaning program. Spray Cleanstat Static Dissipative Rubber and Vinyl Mat Cleaner over an area to be cleanerd and with a clean lint-free cloth, wipe the surface until dry. For set-in stains, let stand for a few seconds (30) and wipe clean. Cleanstat can be used on keyboards and some CRTs with a lint free cloth. Use swabs for tight areas. S20.20 paragraph 5.3.1.14; periodic cleaning is recommended along with testing as part of your full ESD static control program.
