### Product Information

The Slow Drying Flux Remover is a powerful, high-purity flux remover and degreaser. Drying residue free, it is the only citrus-based aerosol packaged formulation on the market engineered for benchtop use that is made without surfactants or additives.

This naturally derived product provides excellent cleaning power on fluxes, pastes, inks, oils and grease. Use on PCBs, FR-4, components, connectors, cables, and mechanical assemblies. It is an effective way to remove many circuit board conformal coatings and it also provides an excellent means to dissolve many adhesives used to apply pressure sensitive labels.

As a slow-drying cleaning fluid, a small amount can effectively clean a large area of contamination, minimizing solvent usage and waste. Made from citrus derived renewable resources, it offers a low-cost, environmentally sustainable approach to many difficult industrial cleaning applications. Test before use on plastic and avoid long-term skin contact.
