

## Filters MFX-2200C

### Pre-filter: Fil22P030

Pleated Pre-filter, 420 x 368 x 50mm (16.5 x 14.5 x 2") in size, 60% efficiency rating

- 100% synthetic fibers that are electrostatically charged and thermally bonded
- pleats supported by galvanized, expanded metal
- double wall cardboard frame
- UL Class II

### HEPA / Carbon Filter: Fil22H070

#### Description:

- Frame
  - o Sturdy 16mm thick MDF board
  - o Expanded metal screen on HEPA media side to prevent mechanical damage
- Filter Media- HEPA
  - o 120mm high mini-pleat technology for high performance air filtration
  - o 6.8 m<sup>2</sup> (73.1sqft) total media surface area
  - o Media made from micro glass fiber. Pleats are held apart by fused synthetic threads which provide media with stability
- Gasket
  - o Endless formed gasket (PU) on both sides prevents air bypass

#### Performance Data:

- 99.97% separation efficiency at 0.3 micron
- Low initial pressure drop
