

HandWorker®

Imagination is the only limit to the range of tools HandWorker® can hold, from instrument size pliers to many large and unusual tools.

Hand strained from cutting hard materials? Need two hands to hold a box to rivet? Need a more even crimp? Let HandWorker® relieve the pressure on your production line.

HandWorker®, along with all of Simonds products, was designed with ergonomics in mind.

The HandWorker® from Simonds comes complete with guard for safety. CE approved, the HandWorker® fits in to all production needs. The HandWorker® safety guard is shown open (raised) in some photos for illustrative purposes only. Always close guard before use and while air is on to unit.

**CUT, CRIMP, HOLD,
STRIP, NICK, PUNCH,
RIVET AND MORE.**

QUICK TOOL CHANGE— EASY, SIMPLE, FAST.....

Easy module change

HWM-515

Extra modules
for even quicker
tool changes.

HandWorker® will hold tools
in several positions.
The picture at right shows
actuator set so that the tool
points upward. The results
are time saved, constant
work, and reduced strain on
hands.

THE CONTROL IS ALL YOURS!

1. YOU set the maximum tool opening... an important safety feature.
2. YOU control the tool closing force from soft and delicate to greater than human strength with built-in pressure regulator.
3. YOU adjust the tool closing speed with a separate adjustment knob.
4. YOU choose whether the tool closes fully or closes to a desired opening. This adds special crimping, nicking and other useful functions.
5. YOU select whether the tool faces right, left, forward or up

NO LIM

Put the same tools in
HandWorker® that
you now use by hand.
Relieve “repetitive motion
disorders”, decrease product
rejects, increase production

PROBLEMS ON PRODUCTION LINES?

LET SIMONDS' TEAM OF ENGINEERS
AND NETWORK OF DISTRIBUTORS
HELP SOLVE YOUR PRODUCTION
PROBLEMS
