

Introducing the **ESD Clip**™

Electrically connects a wire shelf to a post (1)

NEW!

Installs in about 5 seconds!

ESD Clip™ (Patent Pending)

- Reduces ESD risks from ungrounded shelving (2)
- Saves time, each clip installs in about 5 seconds
- Removable and reusable if the cart or shelving unit is reconfigured
- Attaches without tools
- Installs without unloading or disassembling the shelving unit
- no metal split sleeves are required
- no drilling no broken screws no broken drill bits no stuck shelves
- Works with most Metro® Super Erecta Shelf®, and Super Adjustable Super Erecta™(3) shelving and other similar shelving

(1) Provides electrical connection to reduce risk from Electro-Static Discharge (ESD) only.
(2) Install one or more ESD Clips™ per shelf. Ground the unit to a common ground with a suitable wire, or ground to an ESD floor using metal feet, a grounding chain, or ESD wheel(s).
(3) METRO® and SUPER ERECTA SHELF® are registered trademarks and SUPER ADJUSTABLE SUPER ERECTA™ is a trademark of Metro Industries, Inc. Static Dynamics is not associated or affiliated in any manner with InterMetro Industries Corporation or its subsidiary Metro Industries, Inc.

See www.static-dynamics.com for more information and strategies on grounding
