

LS 700 Series High-Output Flexible, 5 Watt Light Emitting Diode

- High-grade anti-vibration gooseneck arm
- Compact lamphead for unobstructed work area view
- PUR-sleeved gooseneck arm remains scratch-free in any environment
- Exceptionally long element life (25,000 hours)

Sunnex task lighting systems have set the standard for quality and versatility for more than 30 years. LS Series lamps are ergonomically designed for ease-of-use and engineered to withstand years of constant operation.

The lamps feature a high-grade, flexible, anti-vibration gooseneck arm to accommodate small or hard-to-reach work areas. Scratch-resistant PUR-sleeving protects the gooseneck from harmful dust, oils and moisture.

The L.E.D. element offers twice the luminous intensity of a standard 20 watt halogen bulb, while providing close to 70% less energy consumption, cool-touch heat management and a projected 25,000 hours of high-output lighting.

This quality configuration is backed by the Sunnex Inc. 3-year guarantee.

Suggested Applications for Sunnex Lamps:

- Medical
- Assembly
- Visual Inspection
- OEM Applications
- Fine Assembly
- Industrial Manufacturing
- Office
- Bench Work
- Electronics
- Packaging
