

UltraSoft Tile-Top **AM** No. 419AM

ULTIMATE Performance

UltraSoft Tile-Top is defined by its double-thick sponge base and **NEW anti-microbial (AM)** properties. The nitrile rubber composite sponge offers maximum comfort and resilience and will inhibit the growth of contaminants. The new, non-porous vinyl surface has an extra wear layer for exceptional abrasion and chemical resistance, and is also anti-microbial. This updated version of UltraSoft Tile-Top is designed for comfort and productivity in areas where organic contamination control is important and is ideal for use in general industry settings where worker satisfaction and efficiency are key.

Colors: Black (BK), Blue (BL), Charcoal (CH) and Gray (GY)
