

GRD560R

Quik-Lok Adjustable Heel Grounder

Description

Heel grounding devices provide protection for staff on the move. The GRD560R is constructed from durable materials and features a black elastic nylon strap with buckle closure to maximize fit and comfort.

These heel grounders connect the person wearing them to ground via a proper floor mat or flooring material. Wearing the conductive ribbon inside the shoe or sock assures proper electrical contact with the user. The ribbon connects to the conductive rubber to complete the circuit between the operator and the static controlled floor or mat.

A buried 1 meg ohm resistor is standard. Heel grounders are worn on both feet to provide consistent grounding while in motion.

Meets or exceeds requirements of ANSI ESD-S20.20

Key Features: • Elastic nylon strap with buckle • Buried resistor • 1.25” cup design

Product Specifications

Resistor: 1 meg ohm (+/- 5% tolerance), buried
Color: Black nylon, Black/White rubber
Rubber Exterior: <10e5 ohms, 1.25” wide
Ribbon: Conductive yarn in gray polyester ribbon

Product Number

<u>Item Number</u>	<u>Description</u>
GRD560R	Heel Grounder, Stretch loop, Quik-lok 1 meg

Note: Heel grounders are dependent on foot perspiration in the shoe to create and maintain electrical contact with the body. The GRD560R works reliably with stockings and socks due to the moisture present.
