

Slip Prevention Floor Mat Grip Tape Strips (Item No. MATTAPE)

- Designed specifically for use on highly polished or shiny floors, these will prevent sponge-backed mats from moving out of place.
- They're so effective that only a few are needed even in high traffic areas. See the placement on Figures A and B for best results.
- This unique, anti-microbial polymer is permanently tacky.
- If it ever gets dusty or dirty, simply wipe it off with **I.C. Workstation and Mat Cleaner (#ICSC16ESD)** or a similar cleanser. The strip will quickly dry and regain its tack.
- Package of (4) 6" x 6" strips.

Item	Color
MATTAPE	Blue

Quick and easy placement of Grip Tape Strips allow for a secure placement of a sponge-backed mat on a highly-polished surface.

Figure A - Grip Tape on a 2' x 3' mat.

Figure B - Grip Tape on a 3' x 3' mat.

These strips have a protective coating on **BOTH** sides!

When you are ready to adhere a strip to your mat, please follow these steps:

1. Make sure floor is clean and dry and the back of your mat is wiped off and free of debris and dirt.
2. Peel the Mylar® off the "peel and stick" side of the strip. This is the side that adheres to the mat.
3. Lay the strip on the mat and press it down. The glue is an "active" glue, which means it becomes more tacky over time and may not initially appear to be aggressively stuck to your mat. Don't worry. Within less than 24 hours the strip will be permanently attached.
4. Once the strip or strips are placed on the mat, lift off the outer paper.
5. Turn the mat over and position on the floor.
6. If the strip gets dirty, it can be wiped off with **I.C. Workstation and Mat Cleaner (ICSC16ESD)** or a similar cleanser. The strip will dry quickly and re-gain its tack.
