

GRD580R

Stretch Hook and Loop, High-Vis Heel Grounder

Description

Heel grounding devices provide protection for staff on the move. The GRD580R is constructed from durable materials and features a red stretch hook and loop strap to maximize fit and comfort. The red strap makes the heel grounder easy to spot which ensures that an employee is wearing them during a shift.

Heel grounders connect the person wearing them to ground via a proper floor mat or flooring material. Wearing the conductive ribbon inside the shoe or sock assures proper electrical contact with the user. The ribbon connects to the conductive rubber to complete the circuit between the operator and the static controlled floor or mat.

A buried 1 meg ohm resistor is standard.

Key Features: • **Stretch Loop Closure** • **Non-Marking** • **1.25" Cup Design**

Product Specifications

Resistor: 1 meg ohm (+/- 5% tolerance), buried
Color: Red stretch hook and loop, black rubber
Rubber Exterior: <10e5 ohms, 1.25" wide
Ribbon: Conductive yarn in gray polyester ribbon

Product Number

<u>Item Number</u>	<u>Description</u>
GRD580R	Heel Grounder, Stretch loop, Red, 1 meg

Note: Heel grounders are dependent on foot perspiration in the shoe to create and maintain electrical contact with the body. The GRD580R works reliably with stockings and socks due to the moisture present.
