

DEK Solder Paste Nozzle

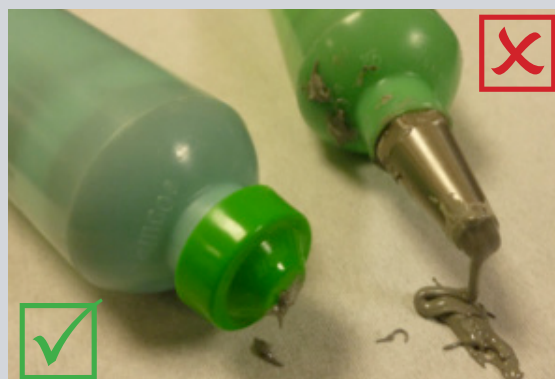

ASM Assembly Systems introduce our latest Process Support Product designed to reduce process costs, material waste & operator interaction.

- **Colour Coded**
 Visual identification of LEADED and LEAD-FREE solder pastes.
 ASM Part Nos.: 800114 (Green) & 800115 (Red)
- **Non-Drip**
 Paste flow is more controlled and excess material delivery reduced.
 'X' flow profile promotes paste mixing during solder bead deposition.
- **Disposable**
 Simple reduced cost part can be thrown away with the empty solder paste tube. No more messy nozzle changes for operators.
 Compatible with SEMCO ® type paste tubes.

- **Low Waste & Anti-Mix Strategy Compliant**
 Compact format reduces the amount of paste 'in transit' through the nozzle. Disposable nature ensures no cross contamination of paste types.

DEK Solder Paste Nozzle

▪ Ordering Information

ASM Paste Nozzles are available in Bulk Packs of 500 pcs.

Order ASM Part No.:

800120 **Green x 500** (Lead Free)

800125 **Red x 500** (Lead Rich)

Paste Nozzle Evaluation Packs containing 25pcs are also available:

800121 **Green x 25**

800126 **Red x 25**
