

ST 925

Convective & Infrared SMT Rework System

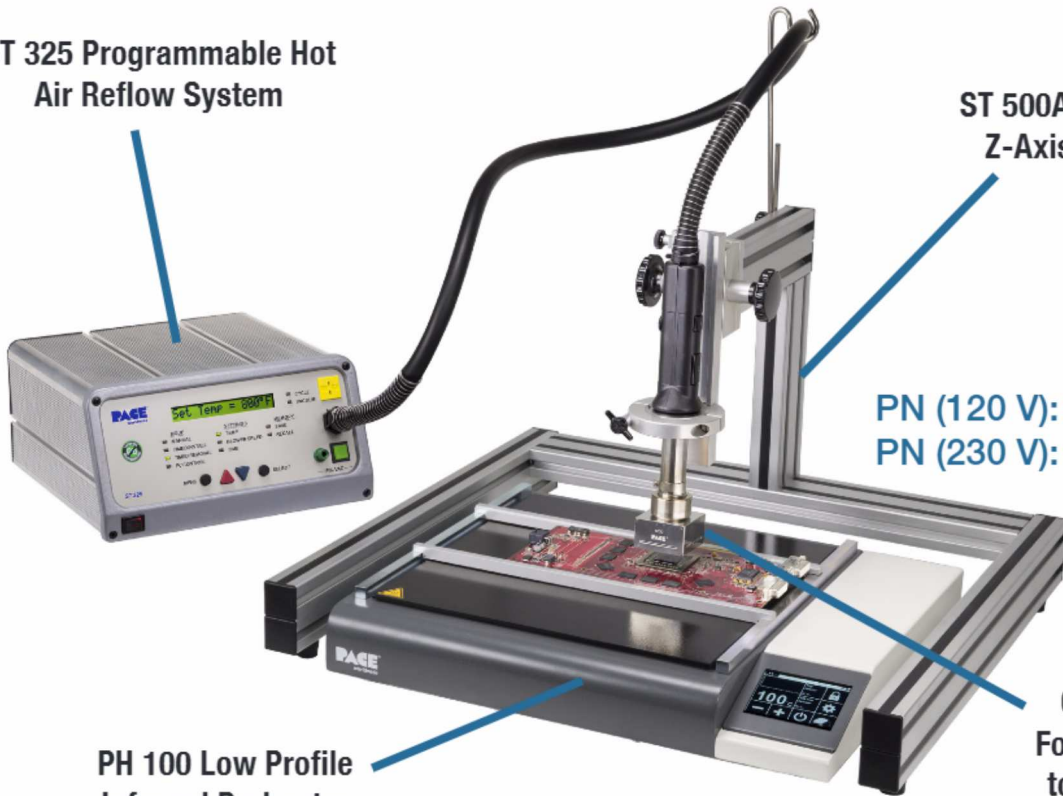

\$3,900

Low-Cost Combo System for SMT Rework

**ST 325 Programmable Hot
Air Reflow System**

**ST 500A Adjustable
Z-Axis Platform**

PN (120 V): 8007-0576
PN (230 V): 8007-0577

**PH 100 Low Profile
Infrared Preheater**

**Over 80 Heat-
Focusing Nozzles
to Choose From**

The ST 925 combines three popular PACE products together into one convenient, low-cost SMT Rework System. The system is comprised of the ST 325 Programmable Convective/ Hot Air Rework Station, the PH 100 Low Profile Infrared Preheater and the ST 500A Z-Axis Platform. Together, the system provides a powerful 575 Watt convective top-side heater plus a 1600 Watt IR bottom-side preheater which allows operators to safely rework PCBs for fast, efficient soldering, rework or repair, even on the highest mass, thermally challenging, lead-free PCBs.
