Product Information

The MicroCare™ RMA Flux Remover Pen is an economical flux remover for cleaning aged and heavy baked-on fluxes. The residue-free formula works on RH, R, and No-Clean fluxes for both tin/lead solders and high temperature lead-free solders. It quickly penetrates and dissolves excess flux and removes ionic and non-ionic activators that cause white residues. It dries residue free.

This extra-strength flux remover cleans all types of flux, pastes, inks, finger prints, oxides, oils, and grease. It also effectively dissolves many adhesives and silicone fluids commonly found on electronic assemblies. Use the RMA Flux Remover Pen on printed circuit boards, FR-4, components, connectors, cables, and mechanical assemblies. Test before use on plastics.
