

# **SAFETY DATA SHEET**

Flux-Off® Delta

# Section 1. Identification

| GHS product identifier           | : Flux-Off® Delta   |
|----------------------------------|---|
| Product code                     | : DEL192,DEL592,DEL5592   |
| Other means of<br>identification | <ul> <li>Fluxing agents Remover.</li> <li>Non-flammable. (ASTM D56 TAG CC) Cleaning solutions.</li> </ul> |
| Product type                     | : Liquid.   |

Relevant identified uses of the substance or mixture and uses advised against Not applicable.

| Supplier's details   | : Chemtronics<br>8125 Cobb Center Drive<br>Kennesaw, GA 30152 |
|--|---|
|  | Tel. 770-424-4888 or toll free 800-645-5244                   |
| Emergency telephone<br>number (with hours of<br>operation) | : Chemtrec - 1-800-424-9300 or collect 703-527-3887 24/7      |

# Section 2. Hazards identification

| OSHA/HCS status                            | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).  |
|--|--|
| Classification of the substance or mixture | : ACUTE TOXICITY (oral) - Category 4<br>SKIN IRRITATION - Category 2<br>EYE IRRITATION - Category 2A   |
|  | Percentage of the mixture consisting of ingredient(s) of unknown toxicity: 45%   |
| GHS label elements                         |  |
| Hazard pictograms                          |  |
|  |  |
| Signal word                                | : Warning  |
| Hazard statements                          | : Harmful if swallowed.<br>Causes serious eye irritation.<br>Causes skin irritation.   |
| Precautionary statements                   |  |
| Prevention                                 | : Wear protective gloves. Wear eye or face protection. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling.   |
| Response                                   | : IF SWALLOWED: Call a POISON CENTER or physician if you feel unwell. Rinse<br>mouth. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated<br>clothing and wash it before reuse. If skin irritation occurs: Get medical attention. IF IN<br>EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if<br>present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention |
| 04   | . Nat analizable   |

 Storage
 : Not applicable.

 Disposal
 : Dispose of contents and container in accordance with all local, regional, national and international regulations.

 Hazards not otherwise
 : None known.

Hazards not otherwise classified

### Section 3. Composition/information on ingredients

#### Substance/mixture Other means of identification

. ...

-

: Mixture

: Fluxing agents Remover.

Non-flammable. (ASTM D56 TAG CC) Cleaning solutions.

| Ingredient name        | %         | CAS number |
|------------------------|-----------|------------|
| trans-dichloroethylene | ≥25 - ≤50 | 156-60-5   |
| tetrahydrofuran        | ≤3        | 109-99-9   |
| methanol               | ≤3        | 67-56-1    |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

. . .

### Section 4. First aid measures

-

| Description of necessary first | aid measures   |
|--------------------------------|--|
| Eye contact                    | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
| Inhalation                     | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.   |
| Skin contact                   | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion                      | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

| Most important sympt       | oms/effects, acute and delayed  |
|----------------------------|---|
| Potential acute healt      | h effects   |
| Eye contact                | : Causes serious eye irritation.  |
| Inhalation                 | <ul> <li>At very high concentrations, can displace the normal air and cause suffocation from lack<br/>of oxygen.</li> </ul> |
| Skin contact               | : Causes skin irritation.   |
| Ingestion                  | : Harmful if swallowed.   |
| <u>Over-exposure signs</u> | /symptoms   |
| Eye contact                | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness                                  |

# Section 4. First aid measures

| Inhalation                 | : Adverse symptoms may include the following:<br>dizziness/vertigo<br>drowsiness/fatigue<br>headache   |
|----------------------------|--|
| Skin contact               | : Adverse symptoms may include the following:<br>irritation<br>redness   |
| Ingestion                  | : Adverse symptoms may include the following:<br>Irritating to mouth, throat and stomach.<br>Ingestion Seek medical attention.   |
| Indication of immediate me | dical attention and special treatment needed, if necessary   |
| Notes to physician         | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.</li> <li>The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul> |
| Specific treatments        | : No specific treatment.   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.                       |

#### See toxicological information (Section 11)

### Section 5. Fire-fighting measures

|   | 0          | 0   |
|---|------------|---|
| Extinguishing media                           |            |   |
| Suitable extinguishing media                  | :          | Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishin<br>media              | g :        | None known.   |
| Specific hazards arising from the chemical    | :          | In a fire or if heated, a pressure increase will occur and the container may burst.   |
| Hazardous thermal decomposition products      | ;          | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>halogenated compounds<br>carbonyl halides   |
| Special protective actions for fire-fighters  | <b>s</b> : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Special protective equipment for fire-fighter |            | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.                         |

# Section 6. Accidental release measures

| Personal precautions, protective equipment and emergency procedures |   |  |  |
|---|---|--|--|
| For non-emergency<br>personnel                                      | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |  |
| For emergency responders  | : | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |  |
| Environmental precautions   | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).  |  |

### Section 6. Accidental release measures

#### Methods and materials for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

### Section 7. Handling and storage

### Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.  |
|--|--|
| Advice on general occupational hygiene                             | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. |

# Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name                   |          |                        | Exposure limits | 6                          |     |
|-----------------------------------|----------|------------------------|-----------------|----------------------------|-----|
| trans-dichloroethylene            |          |                        | ACGIH TLV (Un   | ited States, 3/2015).      |     |
| -                                 |          |                        | TWA: 200 ppm    | 8 hours.                   |     |
|                                   |          |                        | TWA: 793 mg/i   |                            |     |
| tetrahydrofuran                   |          |                        | •               | ited States, 3/2015).      |     |
|                                   |          |                        | Absorbed throu  |                            |     |
|                                   |          |                        | STEL: 100 ppn   | •                          |     |
|                                   |          |                        | TWA: 50 ppm 8   |                            |     |
|                                   |          |                        |                 | ited States, 10/2013).     |     |
|                                   |          |                        | STEL: 735 mg/   |                            |     |

# Section 8. Exposure controls/personal protection

| •                                | • • •  |
|----------------------------------|--|
| methanol                         | ACGIH TLV (United States, 3/2015).<br>Absorbed through skin.<br>STEL: 328 mg/m <sup>3</sup> 15 minutes.<br>STEL: 250 ppm 15 minutes.<br>TWA: 262 mg/m <sup>3</sup> 8 hours.<br>TWA: 200 ppm 8 hours.<br>NIOSH REL (United States, 10/2013).<br>Absorbed through skin.<br>STEL: 325 mg/m <sup>3</sup> 15 minutes.<br>STEL: 250 ppm 15 minutes.<br>TWA: 260 mg/m <sup>3</sup> 10 hours.<br>TWA: 200 ppm 10 hours.<br>OSHA PEL (United States, 2/2013).<br>TWA: 260 mg/m <sup>3</sup> 8 hours.<br>TWA: 200 ppm 8 hours.<br>TWA: 200 ppm 8 hours.<br>TWA: 200 ppm 8 hours.<br>STEL: 325 mg/m <sup>3</sup> 15 minutes.<br>STEL: 325 mg/m <sup>3</sup> 15 minutes.<br>STEL: 325 mg/m <sup>3</sup> 15 minutes.<br>STEL: 325 mg/m <sup>3</sup> 15 minutes. |
|                                  | STEL: 250 ppm 15 minutes.<br>TWA: 260 mg/m <sup>3</sup> 8 hours.   |
|                                  | TWA: 200 mg/m² 8 hours.<br>TWA: 200 ppm 8 hours.   |
|                                  | ····· PP.··· • ·····   |
| Appropriate engineering controls | : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.   |
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |
| Individual protection meas       | <u>sures</u>   |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.  |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.   |
| Skin protection                  |  |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated.   |
| Body protection                  | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Other skin protection            | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection           | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.   |
|                                  |  |

# Section 9. Physical and chemical properties

| Appearance                                   |   |
|--|---|
| Physical state                               | : Liquid. [Liquid.]   |
| Color  | : Clear. Colorless.   |
| Odor   | : Ethereal.   |
| Odor threshold                               | : Not available.  |
| рН   | : Not available.  |
| Melting point                                | : Not available.  |
| Boiling point                                | : 37°C (98.6°F)   |
| Flash point                                  | : Closed cup: >93.3°C (>199.9°F) [Tagliabue.] None per ASTM D-56 (TAG CC) |
| Evaporation rate                             | : >1 (butyl acetate = 1)  |
| Flammability (solid, gas)                    | : Not available.  |
| Lower and upper explosive (flammable) limits | : Not available.  |
| Vapor pressure                               | : 27.3 kPa (205 mm Hg) [room temperature]                                 |
| Vapor density                                | : Not available.  |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Avoid increased storage temperature.        |
| Incompatible materials             | : No specific data.  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

### Section 11. Toxicological information

#### Information on toxicological effects

Acute toxicity

6/13

# Section 11. Toxicological information

| Product/ingredient name | Result               | Species | Dose        | Exposure |
|-------------------------|----------------------|---------|-------------|----------|
| trans-dichloroethylene  | LC50 Inhalation Gas. | Rat     | 24100 ppm   | 4 hours  |
| -                       | LD50 Dermal          | Rabbit  | >5 g/kg     | -        |
|                         | LD50 Oral            | Rat     | 1235 mg/kg  | -        |
| tetrahydrofuran         | LD50 Oral            | Rat     | 1650 mg/kg  | -        |
| methanol                | LC50 Inhalation Gas. | Rat     | 145000 ppm  | 1 hours  |
|                         | LC50 Inhalation Gas. | Rat     | 64000 ppm   | 4 hours  |
|                         | LD50 Dermal          | Rabbit  | 15800 mg/kg | -        |
|                         | LD50 Oral            | Rat     | 5600 mg/kg  | -        |

#### Irritation/Corrosion

| Product/ingredient name | Result                   | Species | Score | Exposure                   | Observation |
|-------------------------|--------------------------|---------|-------|----------------------------|-------------|
| trans-dichloroethylene  | Eyes - Moderate irritant | Rabbit  | -     | 10 milligrams              | -           |
|                         | Skin - Moderate irritant | Rabbit  | -     | 24 hours 500<br>milligrams | -           |
| methanol                | Eyes - Moderate irritant | Rabbit  | -     | 24 hours 100<br>milligrams | -           |
|                         | Eyes - Moderate irritant | Rabbit  | -     | 40 milligrams              | -           |
|                         | Skin - Moderate irritant | Rabbit  | -     | 24 hours 20<br>milligrams  | -           |

Potential acute health effects

| Fotential acute health enects |   |
|-------------------------------|---|
| Eye contact                   | : Causes serious eye irritation.  |
| Inhalation                    | : At very high concentrations, can displace the normal air and cause suffocation from lack of oxygen. |
| Skin contact                  | : Causes skin irritation.   |
| Ingestion                     | : Harmful if swallowed.   |

#### Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

| ļ |          |         |
|---|----------|---------|
|   | Disposal | methods |
|   |          |         |

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

#### United States - RCRA Toxic hazardous waste "U" List

### Section 16. Other information

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.

Copyright ©2001, National Fire Protection Association, Quincy, MA 02269. This warning system is intended to be interpreted and applied only by properly trained individuals to identify fire, health and reactivity hazards of chemicals. The user is referred to certain limited number of chemicals with recommended classifications in NFPA 49 and NFPA 325, which would be used as a guideline only. Whether the chemicals are classified by NFPA or not, anyone using the 704 systems to classify chemicals does so at their own risk.

#### Procedure used to derive the classification

| Classification   | Justification  |
|--|--|
| ACUTE TOXICITY (oral) - Category 4<br>SKIN IRRITATION - Category 2<br>EYE IRRITATION - Category 2A | Calculation method<br>Calculation method<br>Calculation method |
