

## BCR<sup>®</sup> Cleanroom Glove Liners

Protection and Comfort During Extended Wear

BCR<sup>®</sup> cleanroom glove liners enhance operator comfort. They greatly reduce perspiration and contact dermatitis associated with wearing latex, urethane, PVC, nitrile and other chemical handling gloves. In response to environmental and economical concerns, our glove liners can be repeatedly laundered and reused. Berkshire offers a complete line of glove liners in polyester and nylon to meet your specific need and application. Choose from a wide range of sizes that are color-coded for easy stock control.

### BCR<sup>®</sup> Polyester Glove Liners

- 100% continuous filament knitted polyester
- Polyester offers a thinner yet durable barrier for the wearer.
- Full-finger design allows total protection for the most sensitive glove users
- Half-fingered design covers palm and parts of fingers to permit tactile use while wicking moisture from palms
- Reusable, ambidextrous, seamless construction

### BCR<sup>®</sup> Nylon and Single-Knit Nylon Glove Liners

- 100% knitted nylon
- Single-Knit Nylon is a thinner and more comfortable glove liner
- Nylon glove liners are heavier and more durable and can withstand more laundry washes
- Full-finger design allows total protection for the most sensitive glove users
- Half-fingered design covers palm and parts of fingers to permit tactile use while wicking moisture from palms
- Reusable, ambidextrous, seamless construction

### Applications

- For use in laboratories and manufacturing environments
- Can be used alone as inspection gloves to prevent fingerprints on circuit boards, glassware, lenses, optics and other critical surface
- Nylon glove liners provide a thin barrier for wet and temperature related processing
- The glove liner is suitable in any ISO class cleanroom when worn under a nitrile, latex, vinyl, neoprene or other type glove
