

# Safety Data Sheet

FOR REGULATORY AND SDS QUESTIONS (U.S. AND CANADA):  
**CALL THE PRODUCT STEWARDSHIP LINE**  
**1- 908-791-2336 9 AM TO 6 PM ET (Mon-Fri)**

## Section 1. Identification

**Product name** : 245 Sn63Pb37 Solder Wire  
**Product code** : 245Alloy63  
**Product type** : Solid.  
**Date of issue/Date of revision** : March 10 2023.

| Manufacturer - Supplier  | Telephone no.:   | Emergency phone:                              |
|--|--|---|
| Alpha Assembly Solutions Inc.<br>800 West Thorndale Avenue<br>Itasca, IL 60143 USA                                     |  800-253-7837<br>1-630-616-4000 | DOMESTIC NORTH AMERICA<br>202-464-2554        |

## Section 2. Hazards identification

**OSHA/HCS status** : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

**Classification of the substance or mixture** :  CARCINOGENICITY - Category 2  
 TOXIC TO REPRODUCTION - Category 1A  
 SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1  
 AQUATIC HAZARD (ACUTE) - Category 1  
 AQUATIC HAZARD (LONG-TERM) - Category 1

### GHS label elements

**Hazard pictograms** :

**Signal word** :  Danger

**Hazard statements** :  Suspected of causing cancer.  
 May damage fertility or the unborn child.  
 Causes damage to organs through prolonged or repeated exposure. (nervous system, reproductive organs)  
 Very toxic to aquatic life with long lasting effects.

### Precautionary statements

**Prevention** :  Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Avoid release to the environment. Do not breathe dust. Do not eat, drink or smoke when using this product. Wash thoroughly after handling.

**Response** :  Collect spillage. IF exposed or concerned: Get medical advice or attention.

**Storage** : Store locked up.

*Continued on next page*

## Section 2. Hazards identification

**Disposal** : Dispose of contents and container in accordance with all local, regional, national and international regulations.

**Hazards not otherwise classified** : None known.

## Section 3. Composition/information on ingredients

**Substance/mixture** : Mixture

| Ingredient name         | %     | CAS number |
|-------------------------|-------|------------|
| tin                     | 60-70 | 7440-31-5  |
| lead                    | 30-40 | 7439-92-1  |
| Proprietary Rosin/Resin | 1-10  | -          |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

**There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.**

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

### Description of necessary first aid measures

- Eye contact** : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 30 minutes, keeping eyelids open. Get medical attention.
- Inhalation** : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
- Skin contact** : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 15 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.
- Ingestion** : Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

- Eye contact** : No known significant effects or critical hazards.
- Inhalation** : No known significant effects or critical hazards.
- Skin contact** : No known significant effects or critical hazards.
- Ingestion** : No known significant effects or critical hazards.

#### Over-exposure signs/symptoms

- Eye contact** : No specific data.

## Section 4. First aid measures

- Inhalation** : Adverse symptoms may include the following:  
reduced fetal weight  
increase in fetal deaths  
skeletal malformations
- Skin contact** : Adverse symptoms may include the following:  
reduced fetal weight  
increase in fetal deaths  
skeletal malformations
- Ingestion** : Adverse symptoms may include the following:  
reduced fetal weight  
increase in fetal deaths  
skeletal malformations

### Indication of immediate medical attention and special treatment needed, if necessary

- Notes to physician** : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- Specific treatments** : No specific treatment.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. If it is suspected that mists are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

### Extinguishing media

- Suitable extinguishing media** : Use an extinguishing agent suitable for the surrounding fire.
- Unsuitable extinguishing media** : None known.

**Specific hazards arising from the chemical** : This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

**Hazardous thermal decomposition products** : Decomposition products may include the following materials:  
metal oxide/oxides

**Special protective actions for fire-fighters** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

**Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

- For non-emergency personnel** : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

Continued on next page

## Section 6. Accidental release measures

**For emergency responders** : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

**Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

### Methods and materials for containment and cleaning up

**Small spill** : Move containers from spill area. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor.

**Large spill** : Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

### Precautions for safe handling

**Protective measures** : Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid release to the environment. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

**Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

**Conditions for safe storage, including any incompatibilities** : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

## Section 8. Exposure controls/personal protection

### Control parameters

#### Occupational exposure limits

in

**ACGIH TLV (United States, 3/2017).**

TWA: 2 mg/m<sup>3</sup>, (as Sn) 8 hours.

**NIOSH REL (United States, 10/2016).**

TWA: 2 mg/m<sup>3</sup>, (as Sn) 10 hours.

**OSHA PEL (United States, 6/2016).**

TWA: 2 mg/m<sup>3</sup>, (as Sn) 8 hours.

**OSHA PEL (United States, 5/2005).**

TWA: 0.05 mg/m<sup>3</sup> 8 hours.

**OSHA PEL 1989 (United States, 3/1989).**

lead

Continued on next page

## Section 8. Exposure controls/personal protection

TWA: 50 µg/m<sup>3</sup>, (as Pb) 8 hours.

**ACGIH TLV (United States, 3/2017). Notes: as Pb**

TWA: 0.05 mg/m<sup>3</sup>, (as Pb) 8 hours.

**OSHA PEL (United States, 6/2016). Notes: as Pb**

TWA: 50 µg/m<sup>3</sup>, (as Pb) 8 hours.

**NIOSH REL (United States, 10/2016). Notes: See Appendix C - Supplemental Exposure Limits Note: The REL and PEL also apply to other lead compounds (as Pb).**

TWA: 0.05 mg/m<sup>3</sup> 8 hours.

- Appropriate engineering controls** : If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
- Environmental exposure controls** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
- Individual protection measures**
- Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
- Eye/face protection** : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
- Skin protection**
- Hand protection** : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
- Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Other skin protection** : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Respiratory protection** : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

## Section 9. Physical and chemical properties and safety characteristics

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

### Appearance

- Physical state** : Solid.
- Color** : Silver. Gray.

| Decomposition temperature                               | : Not available.                                      |
| Viscosity   | : <input checked="" type="checkbox"/> Not applicable. |
| Flow time (ISO 2431)                                    | : <input checked="" type="checkbox"/> Not available.  |
| <b>Particle characteristics</b>                         |   |
| Median particle size                                    | : <input checked="" type="checkbox"/> Not available.  |

## Section 10. Stability and reactivity

|   |  |
|---|--|
| Reactivity                              | : No specific test data related to reactivity available for this product or its ingredients.           |
| Chemical stability                      | : The product is stable.   |
| Possibility of hazardous reactions      | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Incompatibility with various substances | : Reactive or incompatible with the following materials: oxidizing materials, acids and alkalis.       |
| Hazardous decomposition products        | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
| Hazardous polymerization                | : Under normal conditions of storage and use, hazardous polymerization will not occur.                 |

## Section 11. Toxicological information

### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name | Result      | Species | Dose        | Exposure |
|-------------------------|-------------|---------|-------------|----------|
| tin                     | LD50 Oral   | Rat     | >2000 mg/kg | -        |
| lead                    | LD50 Oral   | Rat     | >5000 mg/kg | -        |
| Proprietary Rosin/Resin | LD50 Dermal | Rabbit  | >2.5 g/kg   | -        |
|                         | LD50 Oral   | Mouse   | >3 g/kg     | -        |
|                         | LD50 Oral   | Rat     | >4 g/kg     | -        |

Continued on next page

## Section 11. Toxicological information

### Irritation/Corrosion

Not available.

### Sensitization

Not available.

### Mutagenicity

| Product/ingredient name | Test | Experiment                | Result    |
|-------------------------|------|---------------------------|-----------|
| lead                    | -    | Subject: Mammalian-Animal | Equivocal |

### Carcinogenicity

Not available.

### Classification

| Product/ingredient name | OSHA | IARC | NTP  |
|-------------------------|------|------|--|
| lead                    | -    | 2B   | Reasonably anticipated to be a human carcinogen. |

### Reproductive toxicity

| Product/ingredient name | Maternal toxicity | Fertility | Developmental toxin | Species        | Dose                            | Exposure         |
|-------------------------|-------------------|-----------|---------------------|----------------|---------------------------------|------------------|
| lead                    | -                 | -         | Equivocal           | Rat - Female   | Oral: 520 mg/kg                 | -                |
|                         | -                 | -         | Equivocal           | Rat - Female   | Inhalation: 3 mg/m <sup>3</sup> | 24 hours per day |
|                         | Equivocal         | -         | -                   | Mouse - Female | Oral: 300 mg/kg                 | -                |
|                         | -                 | Equivocal | -                   | Mouse          | Oral: 4099.2 mg/kg              | -                |

### Teratogenicity

| Product/ingredient name | Result                 | Species                      | Dose                 | Exposure         |
|-------------------------|------------------------|------------------------------|----------------------|------------------|
| lead                    | Equivocal - Oral       | Mammal - species unspecified | 2118 mg/kg           | -                |
|                         | Equivocal - Inhalation | Rat                          | 10 mg/m <sup>3</sup> | 24 hours per day |

### Specific target organ toxicity (single exposure)

Not available.

### Specific target organ toxicity (repeated exposure)

| Product/ingredient name | Category   | Route of exposure | Target organs                       |
|-------------------------|------------|-------------------|-------------------------------------|
| Lead                    | Category 1 | -                 | nervous system, reproductive organs |

### Aspiration hazard

Not available.

**Information on the likely routes of exposure** : Dermal contact. Inhalation. Ingestion.

### Potential acute health effects

- Eye contact** : No known significant effects or critical hazards.
- Inhalation** : No known significant effects or critical hazards.
- Skin contact** : No known significant effects or critical hazards.
- Ingestion** : No known significant effects or critical hazards.

Continued on next page

## Section 11. Toxicological information

### Symptoms related to the physical, chemical and toxicological characteristics

- Eye contact** : No specific data.
- Inhalation** : Adverse symptoms may include the following:  
reduced fetal weight  
increase in fetal deaths  
skeletal malformations
- Skin contact** : Adverse symptoms may include the following:  
reduced fetal weight  
increase in fetal deaths  
skeletal malformations
- Ingestion** : Adverse symptoms may include the following:  
reduced fetal weight  
increase in fetal deaths  
skeletal malformations

### Delayed and immediate effects and also chronic effects from short and long term exposure

#### Short term exposure

- Potential immediate effects** : Not available.
- Potential delayed effects** : Not available.

#### Long term exposure

- Potential immediate effects** : Not available.
- Potential delayed effects** : Not available.

#### Potential chronic health effects

Not available.

- General** : Causes damage to organs through prolonged or repeated exposure.
- Carcinogenicity** : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.
- Mutagenicity** : No known significant effects or critical hazards.
- Reproductive toxicity** :  May damage fertility or the unborn child.

### Numerical measures of toxicity

#### Acute toxicity estimates

| Route                                    | ATE value      |
|--|----------------|
| <input checked="" type="checkbox"/> Oral | 90364.38 mg/kg |
| <input type="checkbox"/> Dermal          | 58034.58 mg/kg |

## Section 12. Ecological information

### Toxicity

## Section 12. Ecological information

| Product/ingredient name | Result                              | Species  | Exposure |

|                         | Chronic NOEC 0.03 µg/l Fresh water  | Fish - Cyprinus carpio   | 4 weeks  |
|                         | LC50 60.3 mg/l                      | Fish   | 96 hours |

### Persistence and degradability

Not available.

### Bioaccumulative potential

| Product/ingredient name | LogP <sub>ow</sub> | BCF | Potential |
|-------------------------|--------------------|-----|-----------|
| Proprietary Rosin/Resin | 3.42               | -   | low       |

### Mobility in soil

Soil/water partition coefficient (K<sub>oc</sub>) : Not available.

Other adverse effects : No known significant effects or critical hazards.

## Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

|                         | DOT Classification | TDG Classification | Mexico Classification | UN             | IMDG           | IATA           |

## Section 14. Transport information

|                            |     |     |     |     |     |     |
|----------------------------|-----|-----|-----|-----|-----|-----|
| Transport hazard class(es) | -   | -   | -   | -   | -   | -   |
| Packing group              | -   | -   | -   | -   | -   | -   |
| Environmental hazards      | No. | No. | No. | No. | No. | No. |

**Special precautions for user** : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

## Section 15. Regulatory information

**U.S. Federal regulations** : TSCA 5(a)2 proposed significant new use rule (SNUR): No products were found.  
TSCA 5(a)2 final significant new use rule (SNUR): No products were found.  
TSCA 12(b) one-time export notification: No products were found.

**TSCA 12(b) annual export notification:** lead

**United States inventory (TSCA 8b)** : All components are listed or exempted.

### SARA 302/304

#### Composition/information on ingredients

No products were found.

### SARA 311/312

**Classification** :  CARCINOGENICITY - Category 2  
TOXIC TO REPRODUCTION - Category 1A  
SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1

### SARA 313

|                                 | Product name | CAS number | %     |
|---------------------------------|--------------|------------|-------|
| Form R - Reporting requirements | lead         | 7439-92-1  | 30-40 |
| Supplier notification           | lead         | 7439-92-1  | 30-40 |

SARA 313 notifications must not be detached from the SDS and any copying and redistribution of the SDS shall include copying and redistribution of the notice attached to copies of the SDS subsequently redistributed.

### California Prop. 65

 **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov.

### Canada

**Canada inventory** : All components are listed or exempted.

### International regulations

#### Inventory list

**Australia** : Not determined.

**China** : All components are listed or exempted.

**Japan** : All components are listed or exempted.

**New Zealand** : Not determined.

## Section 15. Regulatory information

- Philippines** : Not determined.  
**Republic of Korea** : All components are listed or exempted.  
**Taiwan** : All components are listed or exempted.

## Section 16. Other information

### Hazardous Material Information System (U.S.A.)

|                  |   |
|------------------|---|
| Health           | 1 |
| Flammability     | 0 |
| Physical hazards | 0 |
|                  |   |

### Procedure used to derive the classification

| Classification   | Justification      |
|--|--------------------|
| <input checked="" type="checkbox"/> CARCINOGENICITY - Category 2 | Calculation method |
| TOXIC TO REPRODUCTION - Category 1A                              | Calculation method |
| SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1  | Calculation method |
| AQUATIC HAZARD (ACUTE) - Category 1                              | Calculation method |
| AQUATIC HAZARD (LONG-TERM) - Category 1                          | Calculation method |

### History

- Date of issue/Date of revision** : 3/10/2023  
**Date of previous issue** : 4/28/2022  
**Version** : 1.03

**Regulatory Affairs Department**

### Key to abbreviations

- : ATE = Acute Toxicity Estimate  
BCF = Bioconcentration Factor  
GHS = Globally Harmonized System of Classification and Labelling of Chemicals  
IATA = International Air Transport Association  
IBC = Intermediate Bulk Container  
IMDG = International Maritime Dangerous Goods  
LogPow = logarithm of the octanol/water partition coefficient  
MARPOL = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution)  
N/A = Not available  
SGG = Segregation Group  
UN = United Nations
