

Product Data Sheet

Flexible Mini-Tip Foam Applicator

758CH8540

Product Information

The head is thermoformed and welded to the handle in a single step using a proprietary process that yields an exceptionally clean swab that will not fall apart. The heads are made from either polyester knit, a polyester/nylon microfiber knit, or a polyester non-woven fabric. These swabs are acid and solvent resistant, including acetone.

Applications

- Validate biogenetic/pharmaceutical surfaces
- Clean disk drive components
- Clean sensitive surfaces in optics
- Clean aerospace hardware

Technical Details

Overall Length

Typical Values

4"

Tip

0.12" Dia.
0.12" Length

Handle

0.09" Dia.
0.46" Length

Handle Material

Polypropylene

Head Material

Non-Woven Polyester

Packaging

758CH8540

50 Swabs

- Excellent strength
- High absorbency and absorbency rate
- Excellent solvent compatibility
- Does not generate loose fibers or particles
- No adhesives or binders are used in the construction
- Good for tight tolerance work
- Micro-fiber has increased number of microspace to trap more particles, regardless of wet or dry

» Techni-PRO

Wider selection | Higher quality | Stronger value

We've engineered a new private-label brand for world-class production supplies. You probably already know Techni-PRO products as Techni-Tool, Tec-Cut, Techni-Stat, Tec-Tuff, and other brands. Our goal was the same as it has always been: To give you more. More equipment. More supplies. More value.
