

TECHNI-PRO

Product Data Sheet

Product Number: 758ST086

Model: Heel Grounder, Red & Black Hi-Visibility

Description:

Ground mobile personnel with comfortable stretch hook and loop ESD heel grounders. The grounder is constructed from durable materials and features a stretch hook and loop closure strap and elastic back strap to maximize fit. Heel grounders connect the person wearing them to ground via a properly grounded floor mat or flooring material. Wearing the conductive ribbon inside the shoe or sock assures proper electrical contact with the user. The ribbon connects to the conductive rubber to complete the circuit between the operator and the static controlled floor or mat. A buried 1 meg ohm resistor ensures safety and is standard. Heel grounders must be worn on both feet to provide consistent grounding while in motion.

Picture:

Scope: This specification defines the technical requirements for heel grounders under the brand Techni-Pro. If not otherwise specified, the grounding snap should meet or exceed the requirements of ANSI ESD-S20.20 and ESDA Standard 1.1-2006

Applications:

Heel grounders provide a path-to-ground for operators that must be mobile. Operators should wear two heel grounders, one for each foot and be used in conjunction with an anti-static floor or mat.

Closure Type	Hook & Loop
Non Marring	Yes
Resistor	Yes
Fastener	Hook & Loop
Reusable	Yes
Material	Two Layer Rubber
Color	Red/Black
