

TECHNI-PRO

Product Data Sheet

Product Number: 758ST7532

Model: Heel Grounder, DayGlow, 2 MegOhm Resistor

Description:

Features a tough dual-layer rubber, cut at 1.5" wide, provides the largest surface contact, plus a rotating heel-to-sole, sole-to-heel cup design for maximum longevity. We recommend each operator dress with two heel grounders, one for each foot. This will create a parallel path to ground when standing (two feet down) and provide additional peace of mind when walking about, as one heel grounder will always remain in contact with the grounding surface i.e. ESD floor.

Picture:

Scope: This specification defines the technical requirements for heel grounders under the brand Techni-Pro. If not otherwise specified, the grounding snap should meet or exceed the requirements of ANSI ESD-S20.20 and ESDA Standard 1.1-2006

Applications:

Heel grounders provide a path-to-ground for operators that must be mobile. Operators should wear two heel grounders, one for each foot and be used in conjunction with an anti-static floor or mat.

Closure Type	Stretch Hook & Loop
Non Marring	Yes
Resistor	Yes—1Meg
Fastener	Hook & Loop
Reusable	Yes
Material	Two Layer Rubber
Color	Day-Glow
