

This cleaning kit is the perfect kit for removing the dust, dirt, debris, and silica deposits generated by fusion splicers from V-grooves and other delicate components of fusion splicers. This cleaning kit also features the following:

- **CWP-125 & CWR-125:** 100% cotton cleaning swabs for removing dust, dirt, and debris from v-grooves
- **DW-90:** Pack of 90 lint-free polyester wipes for cleaning bare fiber, connector end-faces, and electronic components
- **EYE-369:** Magnifies the end-faces of fibers or small components of fusion splicers, such as v-grooves
- **FCF-3:** Quick-drying, nonflammable cleaning fluid, perfect for cleaning bare fiber, connector end-faces, and electronic components
- **SOL-H2:** Ultra-bright 300 lm LEDs with built-in motion sensor allows you to wave your hand to effortlessly turn the light on or off
- **VGB-100:** Cleans the built-up acrylate coating in fusion splicer v-grooves
- **H-20:** Rugged carrying case holds all these items in one convenient location
