

PATRIOT® PAT221

Crimp up to #1 AWG with compact PATRIOT power!

The new PATRIOT® PAT221 Compact Battery Crimper is designed specifically for small to midsize terminals. It combines the capabilities of multiple hand tools and expands our current battery tool line.

The PAT221 modular system crimps **#22 AWG - #1 AWG copper terminals and splices**, the largest crimping capability in its class.

Easily crimp our most popular BURNDY® connectors, including:

- **HYLUG™** Type: **YA, YAV** up to **#1 AWG**
- **HYLINK™** Type: **YS, YSV** up to **#1 AWG**
- **INSULUG™** Type: **YAES, YAEV, YAE-N** up to **#10 AWG**

...and many more! See cut sheet for full listing.

Utilizing interchangeable dies and die wheel/nest options, this new crimper series offers versatility, improved ergonomics, increased productivity, and enhanced safety, all in one economical solution.

Its modular capability also provides opportunity for future expansion.

Powered by the same proven Makita® battery platform and compatible with all other Burndy PATRIOT tools.

Features and Benefits

- Scissor action, angled head design
- One-second crimp time with auto retract and calibration
- Interchangeable dies and wheels
- Connector hold feature for easy wire insertion
- Red LED to indicate an incomplete crimp
- LED worklight
- Safety trigger lock – Burndy exclusive!
- Emergency release
- Industry standard battery (Makita)

Markets

- C&I
- OEM
- Renewable Energy
- Telecommunications
