

TECHNICAL DATA

Fluke TLPV-UTOOL Solar PV Connector Unlocking Tool

The TLPV-UTOOL is designed to quickly disconnect solar PV connectors. It works with Fluke TLPV1 and TLPV2 Test Leads that have Staubli MC4 connectors. The tool's unique hinge design allows for unlocking in both parallel and perpendicular configurations, providing versatility in various installation scenarios. Backed by a 90-day warranty, the TLPV-UTOOL ensures reliable performance and ease of use for professionals in the solar industry.

Key Features:

- **Quick Disconnect:** Enables rapid separation of mated solar PV connectors.
- **Compatibility:** Works seamlessly with Fluke TLPV1 and TLPV2 Test Leads equipped with Staubli MC4 connectors.
- **Unlocking Mechanism:** Push pins into the locking clips of the solar PV socket connector to release and separate connections.
- **Versatile Design:** Unique hinge design facilitates unlocking in both parallel and perpendicular configurations.
- **Warranty:** Comes with a 90-day warranty for peace of mind.

Applications:

- **Solar PV Installations:** Ideal for use in solar panel installations where quick and safe disconnection of connectors is required.
- **Maintenance and Troubleshooting:** Facilitates efficient maintenance tasks and troubleshooting procedures in solar PV systems.
