

FOR CONDUCTIVE FLOORS

STATSHINE

Non Insulating, Anti-static Cleaner / Polish that cleans, shines, and increases slip resistance without build up or conductivity change.

STATSHINE is formulated for maintenance of conductive floors. Non film forming, cleans and protects conductive floors, prevents build-up, improves slip resistance and maintains conductivity. Floors can be machine scrubbed, damp or spray buffed as required with use dilution. When scrubbing or mopping, solution can be picked up with wet vacuum or mop. No rinsing required. If floors are heavily soiled, repeat procedure.

NOTE: Ordinary general purpose cleaners and floor finishes will affect conductivity of floors. **STAT-SHINE** is formulated as a one step cleaner and conditioner that will not alter conductivity needed to dissipate static build-up. Especially useful on vinyl, epoxy and composition conductive floors.

SPECIFICATIONS

Composition: Thermo-plastic Copolymer with Natural Soap Cleaner And Slip Resistant Additive
Specific Gravity 1.012 @ 60- F
Wt. per Gallon 8.42 lbs.
pH 9.0-9.2
T.S. 8.6-9.0 Theoretical
Color Off-White
Flash Point None
Phosphates None
Biodegradable Yes
Coverage 1800-2200 Ft²
